

Built for Africa: SMART SOLAR TECHNOLOGY WITH THE CONFIDENCE OF TRUSTED SUPPLY

Advanced PV and energy storage technologies are readily available. Unlocking their full potential requires the supply chain strength, commercial structure, and local delivery capability to bring them to market effectively.

Together, **DoGo Power | BT Industries** bridge the gap between technology and confidence of supply - enabling scalable, intelligent renewable energy solutions built for Africa.

- ✓ Backed by Tsingshan Group (Fortune 500 global leader)
- ✓ 6 Advanced grid-forming PV and energy storage technology
- ✓ Intelligent EMS platform with 24/7 technical support
- ✓ Optimised system architecture for safe, efficient energy delivery

- ✓ 65+ years of proven industrial supply experience
- ✓ Established China-based operation
- ✓ Manufacturing capability and supply chain strength
- ✓ Strong distribution channels across South Africa and Africa
- ✓ Established EPC and industry partnerships

TOGETHER >>>

Integrated technology, supply and manufacturing strength delivering intelligent, accountable and scalable renewable energy solutions.

Dogo Power >>> delivers advanced grid-forming PV and energy storage technology, supported by intelligent EMS platforms designed for stable, efficient renewable energy deployment. Backed by the global strength, R&D capability and industrial scale of Tsingshan Group, Dogo Power brings world-class technology and innovation to the renewable energy sector.

BTI >>> complements this as an Integrated Distribution Partner, assuming responsibility for the entire value chain - from sourcing and technical validation, through planning, stockholding and quality assurance, to delivery at the point of use. With more than 65 years of experience, BTI services sectors including automotive and OEM, industrial manufacturing, aftermarket, mining and heavy industry, and renewable energy. Across both complex supply chains and straightforward operational requirements, BTI applies the same depth of technical understanding, global sourcing strength, and solutioneering mindset to every engagement.

Solar Energy Storage, Mounting Systems & Installation Components >>>

A focused portfolio of energy storage technology, solar mounting systems, and installation components designed to support reliable solar deployment from foundation to connection.

>>> Advanced Grid-Forming Energy Storage Technology

DoGo-268kWh-2H0
Smart GFM Energy Storage System

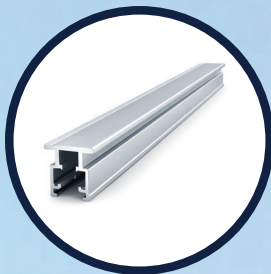

Minimalist design | High efficiency | Ultimate safety
Extra-long lifespan

DoGo-1672/2508kWh-2H0
Smart GFM Energy Storage System

GFM Foundation | Simple Delivery | Smart O&M
Software-Defined Energy
